A square divided into four equal quadrants by a horizontal red line and a vertical red line. The lines intersect at the center of the square.

A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.

A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.

A square divided into four equal quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, the top-right is light green, the bottom-left is light orange, and the bottom-right is light pink.

A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.

A blank coordinate grid with x and y axes ranging from -10 to 10. The grid is divided into four quadrants by the x and y axes. The x-axis is labeled with integers from -10 to 10, and the y-axis is labeled with integers from -10 to 10. The grid lines are spaced at 1-unit intervals.

A square divided into four equal quadrants by a horizontal red line and a vertical red line.

A square divided into four equal quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue. The other three quadrants are white.

A square divided into four equal quadrants by a horizontal red line and a vertical red line. The lines intersect at the center of the square.

A square divided into four equal quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, the top-right is light green, the bottom-left is light orange, and the bottom-right is light pink.

A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is light blue. The bottom-left square is light blue. The bottom-right square is light blue. The grid is defined by a black border on the left and top, and a red border on the right and bottom. The internal lines are red.

A 2x2 grid with red lines. The grid is formed by a horizontal red line and a vertical red line intersecting at the center. The lines are thin and red, set against a white background. The grid is used for writing answers to the questions.

A square divided into four equal quadrants by a horizontal red line and a vertical red line. The quadrants are empty.

A square divided into four equal quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, the top-right is light green, the bottom-left is light orange, and the bottom-right is light pink.

A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is light blue. The bottom-left square is light blue. The bottom-right square is light blue. The grid is defined by a black border on the top, left, and right sides, and a red line on the bottom. The grid is divided into four quadrants by a red horizontal line and a red vertical line.

A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.

A square divided into four equal quadrants by a horizontal red line and a vertical red line.

A square divided into four equal quadrants by a horizontal red line and a vertical red line.

A 2x2 grid with red lines. The grid is formed by a horizontal red line and a vertical red line intersecting at the center. The lines are thin and red, set against a white background. The grid is used for the 'Grid' section of the test.
