A square divided into four equal quadrants by a horizontal red line and a vertical red line. The quadrants are empty.A square divided into four equal quadrants by a horizontal red line and a vertical red line. The lines intersect at the center of the square.A square divided into four equal quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, the top-right is light green, the bottom-left is light orange, and the bottom-right is light pink.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A square divided into four equal quadrants by a horizontal red line and a vertical red line. The quadrants are empty.A square divided into four equal quadrants by a horizontal red line and a vertical red line. The lines intersect at the center of the square.A square divided into four equal quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, the top-right is light green, the bottom-left is light orange, and the bottom-right is light pink.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A square divided into four equal quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, the top-right is light green, the bottom-left is light orange, and the bottom-right is light pink.A square divided into four equal quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, the top-right is light green, the bottom-left is light orange, and the bottom-right is light pink.A square divided into four equal quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, the top-right is light green, the bottom-left is light orange, and the bottom-right is light pink.A square divided into four equal quadrants by a horizontal red line and a vertical red line.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is empty. The top-right square contains a small red dot in the center. The bottom-left square contains a small red dot in the center. The bottom-right square contains a small red dot in the center.A diagram showing a square divided into four equal quadrants by a horizontal red line and a vertical red line. The top-left quadrant contains a small black dot. The other three quadrants are empty. This likely represents a 2D coordinate system or a simple map projection.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is empty. The top-right square contains a small red dot in the center. The bottom-left square contains a small red dot in the center. The bottom-right square contains a small red dot in the center.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is empty. The top-right square contains the text '1.1.1.1'. The bottom-left square contains the text '1.1.1.1'. The bottom-right square contains the text '1.1.1.1'.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is empty. The top-right square contains a small red dot in the center. The bottom-left square contains a small red dot in the center. The bottom-right square contains a small red dot in the center.A 2x2 grid with red lines. The grid is composed of four squares arranged in two rows and two columns. The lines are red and the background is white.A diagram showing a square divided into four equal quadrants by a horizontal red line and a vertical red line. The lines intersect at the center of the square.
