A 2x2 grid with red lines. The grid is composed of four squares arranged in two rows and two columns. The lines are red and intersect at the center. The grid is used for drawing a diagram of a molecule.A square divided into four equal quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, the top-right is light green, the bottom-left is light orange, and the bottom-right is light pink.A square divided into four equal quadrants by a horizontal red line and a vertical red line.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A square divided into four equal quadrants by a horizontal red line and a vertical red line.A square divided into four equal quadrants by a horizontal red line and a vertical red line. A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.

A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.

A 2x2 grid with red lines. The grid is composed of four squares arranged in two rows and two columns. The lines are red and intersect at the center. The grid is used for drawing a diagram of a molecule.

A diagram showing a square divided into four quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, and the top-right quadrant is shaded light orange. The bottom-left and bottom-right quadrants are white.

A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.

A square divided into four equal quadrants by a horizontal red line and a vertical red line.

A square divided into four equal quadrants by a horizontal red line and a vertical red line.

A square divided into four equal quadrants by a horizontal red line and a vertical red line. The quadrants are empty.

A square divided into four equal quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue. The top-right quadrant is shaded light green. The bottom-left quadrant is shaded light orange. The bottom-right quadrant is white.

A square divided into four equal quadrants by a horizontal red line and a vertical red line. The quadrants are empty.

A square divided into four equal quadrants by a horizontal red line and a vertical red line. The quadrants are empty.

A diagram showing a square divided into four quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, and the bottom-right quadrant is shaded light green. The other two quadrants are white.

A diagram showing a square divided into four quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, and the bottom-right quadrant is shaded light green. The other two quadrants are white.

A diagram showing a square divided into four quadrants by a horizontal red line and a vertical red line. The top-right quadrant is shaded gray.

A diagram showing a square divided into four quadrants by a horizontal red line and a vertical red line. The top-right quadrant is shaded light gray.

A diagram showing a square divided into four quadrants by a horizontal red line and a vertical red line. The top-right quadrant is shaded gray.

A diagram showing a square divided into four quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, and the top-right quadrant is shaded light orange. The bottom-left and bottom-right quadrants are white.

A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is empty. The top-right square contains a small black dot in the center. The bottom-left square contains a small black dot in the center. The bottom-right square contains a small black dot in the center.
