A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A diagram showing a square divided into four quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue. The top-right quadrant is shaded light green. The bottom-left quadrant is shaded light orange. The bottom-right quadrant is white.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is empty. The top-right square contains a small black dot in the center. The bottom-left square contains a small black dot in the center. The bottom-right square contains a small black dot in the center.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is white. The top-right square is white. The bottom-left square is white. The bottom-right square is white. The grid is defined by red lines.A 2x2 grid with red lines. The grid is formed by three horizontal lines and three vertical lines, creating four equal squares. The lines are thin and red, set against a white background.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is empty. The top-right square contains a small red dot in the center. The bottom-left square contains a small red dot in the center. The bottom-right square contains a small red dot in the center.A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is empty. The top-right square contains a small red dot in the center. The bottom-left square contains a small red dot in the center. The bottom-right square contains a small red dot in the center.

A 2x2 grid with red lines. The grid is composed of four squares. The top-left square is empty. The top-right square contains a small red dot in the center. The bottom-left square contains a small red dot in the center. The bottom-right square contains a small red dot in the center.A diagram showing a square divided into four quadrants by a horizontal red line and a vertical red line. The top-left quadrant is shaded light blue, and the bottom-right quadrant is shaded light orange. The other two quadrants are white.
